Chief Executive Officer
LifeLine
Kigali, Rwanda

Dear King,

RE: Application for a Front-End Development Internship at LifeLine

I am Fanny Ingabire, an entry-level Front-End developer, writing to apply for a Software Development Internship at LifeLine.

LifeLine's mission to empower Africa's healthcare by granting patients access to life-saving medications at critical times and your vision of transforming Africa's healthcare landscape deeply resonate with me. Your dedication to fostering a thriving community of entrepreneurs and conscious consumers is truly inspiring.

In my recent project, I led the development of a gamified app focused on promoting sustainable fashion practices. This role involved designing and implementing interactive features to engage users and educate them on upcycling, which enhanced my skills in system design, data management, and user experience.

I am eager to contribute to LifeLine's mission by leveraging my skills to support your innovative solutions and drive impactful change in healthcare. I look forward to discussing how my background and experiences align with LifeLine's goals and how I can contribute to your team.

Thank you for considering my application. I am excited about the opportunity to contribute to LifeLine's transformative work.

Best regards,
Fanny Ingabire
